Commercial and Federal Government Sectors
offering IT Strategy & Management, Cybersecurity, Program Rescue & Recovery**

Authentic and committed leader with track record of success leading and developing teams while delivering strategic organizational objectives. Delivers benefits to the organization and customer with integrity and the highest expectations for quality.

PROFESSIONAL EXPERIENCE

Federal Reserve Bank of Richmond (FRIT), Richmond, VA 2010 – Present
OCISO National Information Security Programs, Sr. Manager - Enterprise Programs/Projects

Responsible for the full lifecycle of and/or recovery of mission critical, enterprise projects and Programs for the Federal Reserve System to deliver benefits for the System. Manages and develops geographically dispersed, matrixed- and direct reporting team members ranging from 6 to 20 resources.

- Responsible for facilitating Cybersecurity resiliency and maturity risk assessments for the CISO including FFIEC, NIST CSF, and CERT CRR. Assessments leveraged a hybrid methodology combining peer reviews and Scrum-based velocity. Assessments ranged from 5 to 12 scrum teams.
- Responsible for the credentialing initiative for the US Department of Treasury Fiscal Service as part of [HSPD-12](#). The Program established an outsourced service with an external provider certified with the Federal Bridge, enrolled over 1,000 Applicants, and deployed required software and hardware to Subscribers and Local Registration Authorities at Reserve Banks. This Program also integrated PIV and PIV-I credentials for authentication with multiple boundary and application authentication platforms and revocation checking methods.
- Recovered and delivered a Program that designed and implemented a single standardized Access Model with Reporting and Certification capabilities to complement an automated build and configuration drift recovery across multiple platforms.
- Responsible for the concurrent Web Access Management and Directory Services platform technology refresh and modernization for mission critical [Auction services](#) while maintaining operational and market stability. This service provides approximately 2/3 of Federal Government debt financing held in Treasury bills, notes, and bonds (\$7 trillion in 2015).
- Recovered and delivered a Program that implemented a new Certificate Authority compliant with NIST guidance, an Identity middleware platform and provisioning capabilities integrated into the Business Line's application providing the enrollment for all Depository Institutions working with the Federal Reserve.
- Recovered and delivered the organization's #1 IT Priority in response to the Credit Market Crisis and Board of Governors (BoG) policy. The Program integrated data from existing applications and business lines spanning 5 Reserve Banks.

Gartner, Inc., Arlington, VA
Associate Director, Consulting

2003 – 2010

- Executive / Management Partnership
Provided strategic assessments and recommendation of critical initiatives for Federal CIOs, CFOs, and/or Senior Executive Staff (SES). The partnership model enabled a deep understanding of core business functions and issues, allowing an understanding of the true issues (people, process, and politics) to provide context-based added-value recommendations to address the customer's specific needs.

- Architecture and Technology

Provided IV&V services for a global classified Command and Control system supporting 46,500 users integrating email and cables/telegrams within a COTS-based distributed architecture leveraging TCP/IP and XML. Considerations included project management, solution architecture, as well as sustainability against baseline staffing.

- Business Development

Wrote responses to Federal procurements (e.g., RFI, RFQ, BPA, IDIQ) to receive awards on contracts ranging from \$4.5M to \$25M ceiling.

Alloy Online, Inc., Centreville, VA
IT Director

2000 – 2003

Led CIO's initiative to integrate and standardize application technologies, frameworks, resources and processes from a series of acquisitions into a cost-effective enterprise application platform. Team varied from 5 to 10 staff ranging from junior to senior software development skillsets.
